Tonnage: 150

Client(s): Anglo Belgian Corporation (ABC)

Project start date: 01/10/2020

Project finish date: 31/03/2022

Project specifics

Description

Victor Buyck has been awarded the contract to produce various base frames for different types of engines from ABC's construction line. The two types of engines have a capacity of 10.5MWe and 6.3MWe. These engines will eventually function as an emergency generator on a nuclear site.

The base frames are produced by VBSC and meet very high tolerance and quality requirements. After the application of a strong primer, they are delivered to the ABC workshops in Ghent.
