Tonnage: 250

Client(s): De Werkvenootschap

General Contractor(s): BAM Contractors

Project start date: 11/03/2021

Project finish date: 11/03/2021

Project specifics

Description

The manufacture, transport and assembly of 4 beams of 50m in weather-resistant steel for the eco viaduct across the R0 in Hoeilaart. The delivery of the temporary bracing and the laying equipment, as well as the layout of the fabrication drawings and the erection study belong to the task of Victor Buyck.

The total weight of the beams is about 250 tons. The beams will all be assembled in one night, during which the R0 will be closed for a very short time in order to carry out the installation.
