VICTOR BUYCK STEEL CONSTRUCTION

STEEL AT WORK

# Pater Sangers bridge

***In progress***

## Project type & location

Type: Bruggen

Function: Road bridge

Country: Belgium

Location: Maaseik

Client(s): De Vlaamse Waterweg

General Contractor(s): HYE - Victor Buyck Steel Construction - Hoogmartens Wegenbouw TM

Project start date: 01/04/2024

Project finish date: 31/12/2026

## Project specifics

# Description

Victor Buyck Steel Construction will help with the construction of the new Pater Sangers Bridge, connecting Maaseik in Belgium with the Dutch province of Limburg. The bridge, nearly 200 meters long and 20 meters wide, will be a modern and sustainable infrastructure that improves traffic capacity and safety. The project will be executed in two phases: in the first phase, the existing bridge will remain operational while preparations are made for the new bridge. In the second phase, the new bridge will be built next to the old one, which will then be demolished.
